Bass Sydney Fishing Club is looking for **people to help** make a **difference** to the Sydney Bass fishery.

As well as being a group of dedicated bass anglers, Bass Sydney members have:

- Planted over 1,000 trees, shrubs and native grasses on South Creek
- Worked with Upper Parramatta River Catchment Trust and Parramatta Council on the Fishways project for the four weirs on the Parramatta River
- Been instrumental in having fishway's placed on the Lane Cover Weir and Liverpool Weir.
- Collected Bass DNA from the Hawkesbury Nepean, Williams and Patterson Rivers for a study organised by DPI.

If you care about Bass and it's survival why not join us to promote these and other worthwhile initiatives to improve Bass fishing in and around Sydney. More information can be found on our website:
